Hospice State-Level Live Discharges by Type Report

Q4FY20

A decorative graphic at the bottom of the page consists of several overlapping, light green rectangular and square outlines of varying sizes and orientations, creating a complex, abstract shape.

Hospice Q4FY20 Live Discharges by Type In Descending Order by Total Episodes

Live Discharges by Type - Alaska, 5 Hospices

Type of Live Discharge	Total Episodes	Proportion of Live Discharge Episodes	State Average Length of Stay (in Days)
No longer terminally ill	137	55.9%	169.2
Revocation	83	33.9%	68.7
Moved out of service area	14	5.7%	46.6
Beneficiary transfer	11	4.5%	65.7
All Live Discharges	245	11.5%	123.5

Note: Live discharges are identified as discharges where the patient discharge status code is not equal to 40 (expired at home), 41 (expired in a medical facility) or 42 (expired place unknown). This report is limited to displaying the types of live discharges for which there were a total of at least 11 occurrences during the three fiscal years. Average length of stay is calculated by dividing the total number of days beneficiaries received services from the hospice by the total number of that type of live discharge.

Note: The proportion for All Live Discharges is the proportion for all episodes ending by death or alive

Moved out of service area	784	7.2%	110.7
Discharged for cause	140	1.3%	125.8
All Live Discharges	10,870	12.0%	155.4

Note: Live discharges are identified as discharges where the patient discharge status code is not equal to 40 (expired at home), 41 (expired in a medical facility) or 42 (expired place unknown). This report is limited to displaying the types of live discharges for which there were a total of at least 11 occurrences during the three fiscal years. Average length of stay is calculated by dividing the total number of days beneficiaries received services from the hospice by the total number of that type of live discharge.

Note: The proportion for All Live Discharges is the proportion for all episodes ending by death or alive
